

DEVELOPERS AND MANUFACTURERS OF
HYDRAULIC FLANGES AND COMPONENTS

March 23, 2020

To our valued customers and employees:

MAIN is honored that many customers that make essential products in the Defense, Energy and Transportation areas rely on MAIN for critical components. We have received communication from Defense contractors and through them the Department of Defense asking that we maintain the ability to supply needed product. On March 16, 2020, the President of the United States issued updated Coronavirus Guidance for America. This guidance states that: *"If you work in a critical infrastructure industry, as defined by the Department of Homeland Security..... you have a special responsibility to maintain your normal work schedule."* Based on these request, MAIN MANUFACTURING WILL REMAIN OPEN. MAIN has implemented social distancing, special daily cleaning procedures, and other measures to help our employees. We have reviewed and adjusted our stocking levels of critical component such as raw material, tooling, and other supplies. As the situation continues to develop, MAIN will continue to change and evolve our procedures and staffing levels and are committed to balancing the needs of customers, employees, and the government. We will keep you informed by direct communication or on MAIN's webpage - www.mainmfg.com. Please feel free to call the number or e-mail the address below.

We thank you for your trust and support. Stay safe and healthy.
